Detailed Action

Specification

1. The amended specification submitted on 5/07/2008 has been approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Diesing (3,075,542).

The Diesing reference discloses a fluid dispensing valve (where the fluid is air) having a valve body (7), a tubular valve (2,6) consisting of an inner portion (6) that is slidable inside the valve body between a rest position (vice versa of dispensing position) and a dispensing position (see fig.1); and an outer portion (2) extending, at least in part, outside the valve body (7); and wherein the inner portion (6) is made, at least in part, of a synthetic material (col.1, lines 41-43) and the outer portion (2) is made, at least in part, of a thermally conductive material (2, see cross-hatch in fig.1); and wherein the inner and outer portions are secured to each other (by element 9).

Allowable Subject Matter

4. Claim 20 is objected to as being dependent upon a rejected base claim, but would appear to be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1-18 are allowed.

Response to Arguments

6. Applicant's arguments with respect to claim 19 have been considered but are moot in view of the new ground(s) of rejection.
